Green Burials

The concept of eco-friendly Green Burials and Funerals is a philosophy we admire and are seeking to embrace for the future. Generally speaking, green burials take place within a short period of time (24 to 48 hours after death) and may include direct family involvement for washing and dressing the deceased prior to burial.

At the time of the printing of this price list, there is no green burial ground or section of a cemetery available in either the City of London or in the county of Middlesex. Because of this we are unable to offer "certified" green burial at this time.

However we are committed to the concept and growing practice of Green Burials. As a special order, we can bring in Enviro-caskets, Canadian made by Northern Casket. Also we can provide services in keeping with the best intentions of green burials. As soon as a certified green burial ground or section of a cemetery becomes available in the county of Middlesex, we will be publishing a separate page for green burial services. In the meantime, if you have any questions, please feel free to contact us.
